By single press the button No.2 for previous music and button No.1 to next music. Single press button No.3 to pause.

These operations can be done at your smart device.

Tips:

1. Only one device can be connected to our Bluetooth mirror at the same time.
2. Keeping away from strong magnetic field, electric field, avoiding radiation and heating appliances.
3. The Wi-Fi and blue-tooth functions at phone is in the same output frequency band, when they were using together, it might cause interference between theirs signals and packet collisions, the download speed of Wi-Fi might slow down. For example, when you are listening music online, there might be intermittent because the rate of buffer is going slow down.
4. Because different smart devices using different blue-tooth chip, there might be a little sluggish or connecting distance difference when connecting to blue-tooth mirror.
5. The distance between the cell phone and blue-tooth devices is 10 meters without any obstacles. Normally 2-8 meters while home using, obstacles such as walls or other electronic equipment will affecting distance of connecting.
6. After disconnecting, the Blue-tooth signal will not automatically reconnect, manually operation needed.
7. After the Blue-tooth connecting successfully, normally a sound signal "Du" to show function ready.
